Git Jokes

Group 7

Pitch

Are you tired of looking up jokes on google? Or using twitter and instagram where there are tons of depressing news? Do you want just a social media full of categorize jokes?

With everything going on in the world, we all need a way to have easy access to the jokes of the world. Git Jokes was created so that users may have categorize jokes that they can access 24/7. Whether you're logged in or not, you'll be able to see all the jokes in the community as well as add your own.

Process and Concept

As a User, I want to look at Jokes, When Logged In, I can Post my jokes, and Tweet out a random joke

Technologies: We used Node.js, Express.js, Handlebars, MySql, Sequelize, JawsDB, Heroku and NPM Twitter

Trace: Signup and Categories Handlebars, seed info, categories Javascript and API routes, Bootstrap, got our Twitter page up

Jaxon: NPM Twitter, and general debugging

Ashley: Models, User, Joke, GET/POST API Routes , Login/Categories Routes, Seeding the JawsDB

Michael: Login & New Joke Handlebars, Javascript, and POST/GET Routes, Bootstrap

Success: We got the MVP to function by working through all issues collaboratively

Functionality

- Access a database of jokes through a simple interface

- Add new jokes to the database using the aforementioned interface

- Sign-up as a new user and have it be stored using our secure database

- Post a random joke to our Twitter page

- Filter jokes via categories

LIVE DEMO

Future Developments

- ❏ Search bar functionality to allow users to search for jokes

- ❏ Like or repost jokes to Git Jokes profile page

- ❏ Allow users to post their jokes to their own twitter page

- ❏ Let users customize profiles with pictures and pins for jokes

- ❏ Integrate other social media platforms to post our jokes to

- ❏ Categorize the jokes to the dashboard
